PROFESSIONAL SUMMARY

Detail-oriented and execution-focused application developer and MCA student with hands-on experience building interactive web applications, handling dynamic data, and integrating external APIs. Well-versed in Python, JavaScript, and SQL backend implementations. Possesses a strong analytical mindset, eager to apply engineering fundamentals and code verification skills to contribute to simplified, scalable IT solutions as a Trainee.

TECHNICAL SKILLS

- **Programming & Scripting:** Python, JavaScript, Node.js, Express.js, SQL (MySQL), MongoDB (Mongoose)
- **API & Integration:** Google Gemini API, RESTful APIs, OpenWeatherMap API, JSON Verification, Axios
- **Web Development:** React (Vite), Flask, Django, Tailwind CSS, Bootstrap 5, HTML/CSS, React Router
- **Tools & Deployment:** Git, GitHub, Vercel, Render, GitHub Pages, Hostinger, Excel Automation
- **Soft Skills:** Analytical Thinking, Problem Solving, Team Collaboration, Technical Communication

PROJECTS

User Analytics Dashboard Platform

React (Vite), Node.js, Express.js, MongoDB Atlas, Bootstrap 5

- Engineered a full-stack web analytics platform that captures real-time user interactions (page views, session durations, click event metrics) via a custom client tracker script.
- Developed scalable RESTful API endpoints to process payload structures and securely persist click coordinates relative to viewports into MongoDB Atlas using Mongoose data models.
- Built an interactive visualization dashboard featuring dynamic session path mapping, multi-page routing, and click location heatmaps to track end-to-end user journeys seamlessly.
- Successfully deployed the distributed application across Vercel (frontend), Render (backend production environments), and GitHub Pages for cross-origin tracking simulations.

Gemini Chatbot Application

React (Vite), Flask, Google Gemini API

- Developed a real-time conversational interface by integrating the Google Gemini API to handle text prompts and fetch automated responses securely.
- Implemented session-based chat history features and dynamic UI updates, demonstrating the ability to structure and manage interactive client-server data flows.
- Engineered backend API routes using Flask to process incoming requests and map JSON payload responses cleanly to the user interface.

Weather Forecast & Analytics Web Application

React, JavaScript, OpenWeatherMap API, React Router

- Built a multi-page dashboard application featuring automated data fetching to capture, process, and display live environmental data points.
- Designed a responsive interface with clean client-side routing, applying advanced data filtering logic to convert raw JSON data payloads into organized visual summaries.

Personal Portfolio & Web Showcase

React, Tailwind CSS, Git Automation

- Designed and launched a modern, animated web application to present code repositories, projects, and execution capabilities efficiently.
- Managed end-to-end site delivery and operational setup using GitHub Pages and Hostinger deployment environments.

EDUCATION

Master of Computer Applications (MCA)	2025 – 2027
Galgotias College of Engineering and Technology, Greater Noida, UP	
Bachelor of Arts (B.A.)	2022 – 2025
Pataliputra University, Patna, Bihar	
Class XII (Physics, Chemistry, Mathematics)	2022
BSEB Board, Bihar	
Class X	2020
CBSE Board, Bihar
